Fictional training dataset. All entities, people, locations, policies, prices and contact details are synthetic and created solely for RAG development.

Standard Plan Overview

Standard plans are priced per organization subscription rather than per individual named user. Included user counts are active-user entitlements; additional users are charged according to the overage schedule.

Plan	Monthly	Annual	Included users	Storage	Cloud API	AI actions
Starter	\$19	\$190	5	25 GB	20,000 requests/month	500 AI actions/month
Professional	\$59	\$590	25	250 GB	100,000 requests/month	5,000 AI actions/month
Business	\$149	\$1490	100	1 TB	500,000 requests/month	25,000 AI actions/month
Enterprise	Custom	Custom	Negotiated	Negotiated	Negotiated	Negotiated

Feature Comparison

Feature	Starter	Professional	Business	Enterprise
Custom roles	No	Yes	Yes	Yes
SAML SSO	No	No	Yes	Yes
SCIM provisioning	No	No	No	Yes
Scheduled exports	No	No	Yes	Yes
Dedicated support	No	No	No	Yes
Dedicated infrastructure	No	No	Optional	Available by agreement
AI file limit	50 MB	50 MB	50 MB	500 MB
Uptime commitment	Best effort	Best effort	99.9%	99.9%+

Additional Charges

Item	Standard charge	Notes
Additional user	\$12/user/month	Applied above included user entitlement
Additional Cloud storage	\$8/100 GB/month	Rounded to next 100 GB
Cloud API overage	\$2 per 10,000 requests	Only after included quota
AI overage	\$4 per 1,000 AI actions	Standard plans
Dedicated infrastructure	Custom	Enterprise agreement only

Annual Billing

Annual plans are billed upfront at the listed annual rate. Annual subscriptions are not automatically refundable after the standard refund window; cancellation normally prevents the next renewal rather than producing a prorated refund.

Professional annual pricing is \$590 and Business annual pricing is \$1,490. Starter annual pricing is \$190.

Discounts and Enterprise Rules

- Annual standard plans are priced below twelve monthly payments.
- Volume discounts begin at 250 active users and require a sales-approved order.
- Enterprise pricing is negotiated and is not represented by the public monthly plan values.
- An executed Enterprise order form can define different user, storage, API, AI, support and refund terms.
- Discounts do not automatically change SLA targets unless the order form expressly includes an SLA amendment.

Commercial Examples

Example A: A Professional customer with 25 included users, 300 GB storage and 110,000 Cloud API requests in one month would be billed for one additional 50 GB storage block after rounding rules and 10,000 API requests above quota.

Example B: An Enterprise customer should not be quoted from the public plan table if an executed order form exists. The order form controls negotiated pricing.
