

NEXORA

Privacy Policy

Document ID: NX-PRIV-001 **Version:** 4.0 **Publication:** June 10, 2026 **Last updated:** September 1, 2026

Department: Legal & Privacy **Category:** Privacy **Confidentiality:** Public **Applicable customers:** All

Fictional training dataset. All entities, people, locations, policies, prices and contact details are synthetic and created solely for RAG development.

Scope

This fictional policy explains how Nexora handles information associated with account use, support, product telemetry and AI features. It is designed as synthetic training content and is not legal advice.

Information Collected

- Account identity and contact information
- Billing and subscription metadata
- Workspace configuration
- Product usage events
- Support communications
- Device and browser information
- Security and audit events

Cookies and Analytics

Nexora may use essential cookies for authentication and session integrity and optional analytics technologies for product measurement. Customers can manage optional analytics according to available workspace controls.

AI Data Processing

AI request content is processed to provide requested AI functionality. Standard retention is 30 days; Enterprise configurations may select 7, 30 or 90 days. Nexora states that customer AI content is not used to train a public model unless the customer has separately opted into an applicable program.

Data Retention and Deletion

Retention depends on the data category, legal requirements, security needs and contract terms. Workspace administrators can request deletion of eligible workspace data. Enterprise customers may have additional contractual deletion controls.

Third-Party Processors

Nexora may use synthetic categories of subprocessors for cloud infrastructure, payment processing, email delivery, monitoring and support. A current processor list would be maintained separately from this policy.

Security

Nexora applies encryption in transit and at rest, access controls, logging and incident response procedures. Security commitments are further described in the Security and Compliance Guide.

User Rights

- Access or export eligible account information
- Request correction of inaccurate account information
- Request deletion where applicable
- Object to certain processing where legally available
- Request contractual data-handling information through enterprise channels

International Data Handling

Enterprise customers can select supported data residency arrangements where offered. Availability is subject to the commercial order form and technical deployment options.
