

NEXORA

Terms of Service

Document ID: NX-LEGAL-002 **Version:** 5.1 **Publication:** June 18, 2026 **Last updated:** September 2, 2026

Department: Legal **Category:** Terms of Service **Confidentiality:** Public **Applicable customers:** All

Fictional training dataset. All entities, people, locations, policies, prices and contact details are synthetic and created solely for RAG development.

Account Requirements

Customers must provide accurate registration information, maintain credential security and ensure that users comply with applicable Nexora policies.

Acceptable Use

- Use the services for lawful business purposes
- Maintain reasonable credential security
- Respect usage limits
- Protect access tokens
- Cooperate with security investigations

Prohibited Activities

- Unauthorized access attempts
- Credential sharing that defeats access controls
- Malware distribution
- Abuse of rate limits
- Use that materially interferes with service availability
- Circumvention of security controls

Intellectual Property and User Content

Nexora retains rights in its software, documentation and trademarks. Customers retain rights in their submitted content, subject to the licenses necessary for Nexora to provide the service.

Service Availability

Business and Enterprise plans carry the 99.9% monthly uptime commitment described in the Support and SLA document, subject to the exclusions defined there.

Payments and Subscription

Subscriptions renew according to the selected billing period unless cancelled before renewal. Pricing details are maintained in 03_pricing_and_plans.pdf.

Termination

Nexora may suspend or terminate access for material breach, security risk, non-payment or prohibited use, subject to applicable contractual requirements.

Enterprise Agreements

An executed Enterprise agreement may supersede standard terms for pricing, service levels, data retention, security controls, support, termination and other expressly negotiated provisions.

API and AI Usage

API and AI usage is subject to documented limits. Abuse of rate limits can result in throttling or suspension under security and acceptable-use procedures.
