

NEXORA

Employee Handbook

Document ID: NX-PEO-001 **Version:** 2.5 **Publication:** January 5, 2026 **Last updated:** August 20, 2026

Department: People Operations **Category:** Internal Policy **Confidentiality:** Internal **Applicable customers:** Employees

Fictional training dataset. All entities, people, locations, policies, prices and contact details are synthetic and created solely for RAG development.

Purpose

This fictional handbook defines baseline workplace practices for Nexora employees. Enterprise customer commitments do not automatically modify employee policies.

Working Hours

Standard core collaboration hours are 10:00–16:00 local team time, Monday through Thursday. Friday is a lighter collaboration day. Teams may set schedules appropriate to customer coverage.

Remote Work

- Use approved company-managed devices for sensitive work
- Connect through approved security controls
- Do not store customer secrets in personal cloud drives
- Report device loss promptly

Leave

Leave type	Baseline allowance
Annual leave	20 working days/year
Sick leave	10 working days/year
Parental leave	16 weeks
Emergency leave	Up to 3 working days per event, subject to manager approval

Code of Conduct

- Treat colleagues and customers respectfully
- Avoid conflicts of interest
- Do not misuse company systems
- Protect confidential information
- Report suspected misconduct through approved channels

Password and Device Policy

Passwords must be unique and stored using an approved password manager. MFA is required for privileged systems. Company devices must use full-disk encryption and automatic screen locking.

Communication

Customer commitments should be recorded in approved systems. Employees should not make contractual promises outside their authorization level.

Incident Reporting

Security incidents, lost devices, suspected credential exposure and material customer-impacting errors should be reported immediately to the Security or Support escalation channel.

Internal Escalation

Issue	Primary owner	Secondary escalation
Customer incident	Customer Support	Engineering / Security
Product defect	Product	Engineering
Security concern	Security	Executive incident lead
People concern	People Operations	Executive sponsor

Department Structure

The organization includes Engineering, Product, Data & AI, Security, Customer Success, Support, Sales & Partnerships, Finance and People Operations.
